

RESPONSIBLE SOURCING POLICY

It is the policy and aim of East Kirkby Engineering Company Limited to be committed to protecting and enhancing the environment by the use of responsibly sourced, sustainable products, materials, and goods.

Our business will apply the following objectives:

- Water Use will be minimised
- Materials and products with low environmental impact will take precedence
- Waste will be minimised/reduced including reuse of products, items, pipework, fittings where able
- Waste to be reduced by selecting materials and products with a high recycle content, enhanced durability, and recyclability
- Materials and products to be locally sourced where possible
- Materials and products will be checked for legal and ethical validity, with certification and approved environmental schemes
- Hazardous materials (e.g. refrigerant and insulants will be avoided in favour of non-hazardous materials with lower environmental impact

The achievement of the objectives will be supported by East Kirkby Engineering Company Environmental Policy, Quality Policy, and Health & Safety Policy and procedures.

We will develop our knowledge of environmental materials and understand the material performance and standard. We will engage our supply chain to identify sustainable procurement solutions, and ensure we use environmental preferred solutions and materials. We will advise our clients of environmental preferred materials and products, to achieve a Responsible Sourcing of materials and products.

We will ensure EKE staff receive training on how to meet this Policy requirements, in accordance with their role. We will actively engage with key Clients and supply chain partners to ensure the aims of this policy are met and delivered.
